Kebayoran Lama, Kota Jakarta Selatan, Daerah Khusus Ibukota Jakarta 12210

Mechanical Engineering graduate (S1) with hands-on experience processing heavy equipment maintenance data (HM, PA, MTBF, MTTR, SM) across 3 sites via ERP Ellipse, and building Power BI dashboards to monitor KPIs, backlog, and cost. Trained in heavy equipment maintenance fundamentals through a Basic Mechanic Course and Mining K3 (Occupational Health & Safety) certification, and currently developing SAP PM skills. Aspiring to build a career as a Maintenance Planner in the mining industry. Detail-oriented, analytical, and a fast learner.

Pendidikan

Universitas Pertamina - Jakarta — Sep 2021 - Aug 2025

Bachelor of Mechanical Engineering, 3.45/4.00

- Won Silver Medal (Waste Management category) at the National Applied Science Project Olympiad (NASPO) 2023, Surabaya — research: "Batakok-Green: Utilization of Green Mussel Shell Waste (Perna viridis) as an Electricity-Generating Brick in Cilincing, North Jakarta" (Dec 2023)

Pengalaman Profesional

PT Darma Henwa - Jakarta — Nov 2025 - May 2026

Plant & Maintenance

One of Indonesia's mining contractors, part of the Bakrie Group

- Managed and analyzed pareto problems using the heavy equipment maintenance database to calculate key reliability metrics (PA, MTBF, MTTR, SM), optimizing Heavy Unit reliability across 3 sites in South and East Kalimantan.
- Prepared weekly reports using Advanced Excel to monitor Hours Meter (HM) and daily usage via the "Ellipse" ERP system, enabling daily data retrieval.
- Built dynamic formulas to process multi-installation data into a structured, analysis-ready dataset.
- Designed a component status classification logic (In Service & Scrap) based on up to 20 replacement-history cycles, producing Pivot Table-ready output with valid numerical data for average component lifetime analysis.

PT PLN IP UBP Kamojang - Kamojang — Sep 2024

Field Practice Intern

- Conducted field inspections of geothermal power plant systems, including the Receiving Header, Separator, Condenser, Cooling Tower, Turbine, and Generator.
- Processed Ultrasonic Thickness Test (UTT) data to evaluate pipe wall thickness on straight and 90° bend sections.
- Calculated Corrosion Rate (CR), Maximum Allowable Working Pressure (MAWP), and Remaining Service Life (RSL) in accordance with ASME B31 "Power Piping Code" standards; interpreted P&ID and piping layout drawings.

Pengalaman Organisasi

Himpunan Mahasiswa Mesin (HMM), Universitas Pertamina - Jakarta — Feb 2024 - Aug 2024

Division Head of Academic Affairs

Student association representing Mechanical Engineering students at Universitas Pertamina

- Led the Academic Affairs Division of HMM, coordinating academic-support programs and activities for Mechanical Engineering students.
- Served as liaison between students and faculty on academic-related matters and policies.

Proyek, Sertifikasi & Keahlian

- **Hard Skills**: ERP Ellipse | Power BI (DAX & Power Query) | SAP PM (in progress) | Advanced Excel Automation | Reliability Analysis (PA, MTBF, MTTR, SM) | ASME B31 Piping Standards | P&ID Reading | Heavy Equipment Maintenance | Mining K3
- **Basic Mechanic Course (BMC) – Heavy Equipment, BMC Dharmaditna Yogyakarta** (2026): Scored 83–90 across 12 modules covering HE product knowledge, diesel engine, hydraulic, transmission, and electrical systems.
- **Dasar K3 Pertambangan - PT. Borneo Indo Safety** (2026): Certified in fundamental mining occupational health & safety.
- **Maintenance & Reliability Dashboard for Heavy Equipment Fleet (Power BI)** (2026): Independent project: interactive dashboard for heavy equipment fleet monitoring using dummy data, monitoring KPI, backlog, cost, and PM schedule compliance, documented in a 10-page LinkedIn report covering KPI, backlog, cost, and PM schedule compliance.
